

1st OvaRA Symposium

Integrating Research and Clinical Development in Ovarian Cancer

Zentrum für Tumor- und Immunbiologie (ZTI)
Hans-Meerwein-Str. 3
Lecture Hall: 00/0330

May 17, 2017

9:30 am - 4:15 pm

Speakers:

Introduction: The unique microenvironment of OC

Anti-angiogenic therapy in OC

PARP inhibitors in OC therapy

Promotion of metastasis by p53 gain-of-function mutations

Targeting p53 in OC and integrating translational research
in international multicenter trials

Chemokines and chemokine receptors in OC

Current topics of translational OC research

MicroRNAs and stromal heterogeneity in OC

Defective HLA antigen expression in OC

Role of the cytotoxicity receptor NKG2D in
cancer immunosurveillance

Reprogramming of macrophages in OC

Immunotherapy in OC: first clinical data

Rolf Müller (Marburg)

Domenica Lorusso (Milan)

Philipp Harter (Essen)

Thorsten Stiewe (Marburg)

Nicole Concin (Leuven)

Holger Bronger (Munich)

Elena Braicu (Berlin)

Fatima Mechta-Grigoriou (Paris)

Soldano Ferrone (Boston)

Elke Pogge von Strandmann (Marburg)

Till Adhikary (Marburg)

Florian Heitz (Essen)

Organizers:

Rolf Müller
Uwe Wagner
Philipp Harter

Participation in the symposium is free of charge but registration before **15 April 2017** is required.
Please use the online registration form on www.ovara.net.
